

ISS has done far more than my vision.

PHILIP YEO

ISS champions lifelong learning for Infocomm professionals... [a] mission very much in line with Singapore's Infocomm 21 strategic plan.

It was a mix of enthusiasm, excitement and it was absolutely a team thing that made ISS what it is today.

LATE ROBERT IAU

The Master of Technology degree is definitely very useful to employers. Its graduates are immediately employable at a very high level.

PROFESSOR CHANG CHIEH HANG,

ISS... is a bridge linking management and IT professionals to bring

of the time I spent in ISS.

The industry's demand for ISS courses is a firm testimony that the institute has renewed its value to the industry.

STEPHEN YEO

ISS possesses a great potential to be a customer champion, leveraging on its contacts, alliances and unique grasp of industry needs to be a trusted knowledge gateway.

I have every confidence that ISS will continue to transform itself and help reshape the IT landscape of Singapore and beyond for a long time to come.

Over the past decades, ISS has continually evolved and reinvented itself to remain at the forefront of Singapore's efforts to develop a competitive IT workforce.

ISS has opened up training opportunities to Infocomm professionals at all levels, combining NUS' reputation for academic excellence with the practical relevance of industry best practices and experiences.

Founded as an education institute offering senior executive seminars and the first IT project management training with a four-year partnership with IBM

(now known as Infocomm Development Authority of Singapore) and Singapore conomic Development Board to introduce the Small Enterprise Computerisation Programme for Small and Medium Enterprises (SMEs)
